P 5
Compact Gantry Palletizer
Gripping / Transfer

A gripping/transfer palletizing solution to meet your specific requirements:

▶ TECHNICAL CHARACTERISTICS

- > Ground level access into the machine; lower section is left free thanks to the gantry structure
- > Minimum footprint: palletizer perimeter dimensions as near as possible to the pallet dimensions
- > Overall machine height reduced and visibility/appearance improved by using a telescopic mast

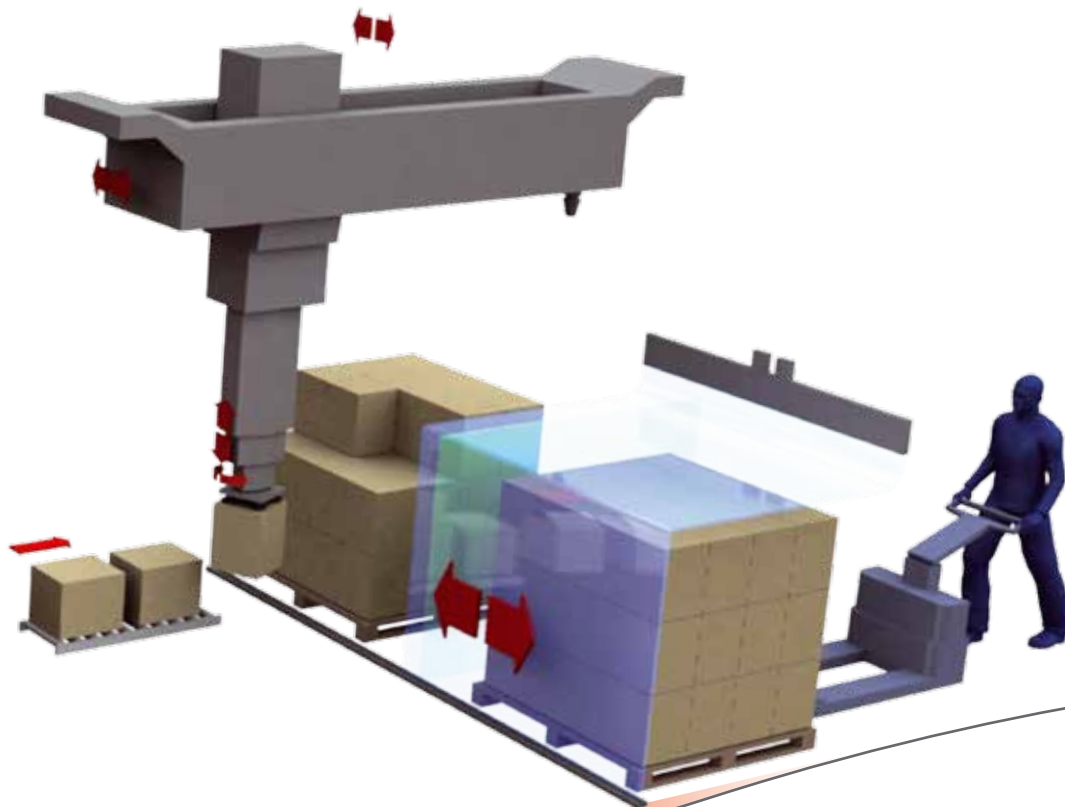

▶ ADVANTAGE

- > Naturally wide working envelope within a compact frame thanks to the gantry design
- > SecurBox™: transparent sliding cubicle enabling the operator to evacuate a loaded pallet safely without stopping the machine cycle; palletization continues on the second station
- > Option: integration of a labeller and a case tipping device directly inside the palletizer

▶ PERFORMANCE

- > Payload: up to 12kg with tooling
- > Speed: up to 7.5 cycles per minute depending on the application
- > Versatility: 1, 2 or 3-station model with optional pallet gripping, layer card insertion, etc.
- > Option: PC HMI/remote maintenance kit
