

- ▶ All types of conveyable products
- ▶ Optimum product protection, whatever the product rigidity and thickness
- ▶ Continuous solution with no accumulation, nor jamming
- ▶ High speed

Your products are in good hands

ProSelex®

Patented Product Collating System

Product collating solutions to meet your specific requirements:

▶ TECHNICAL CHARACTERISTICS

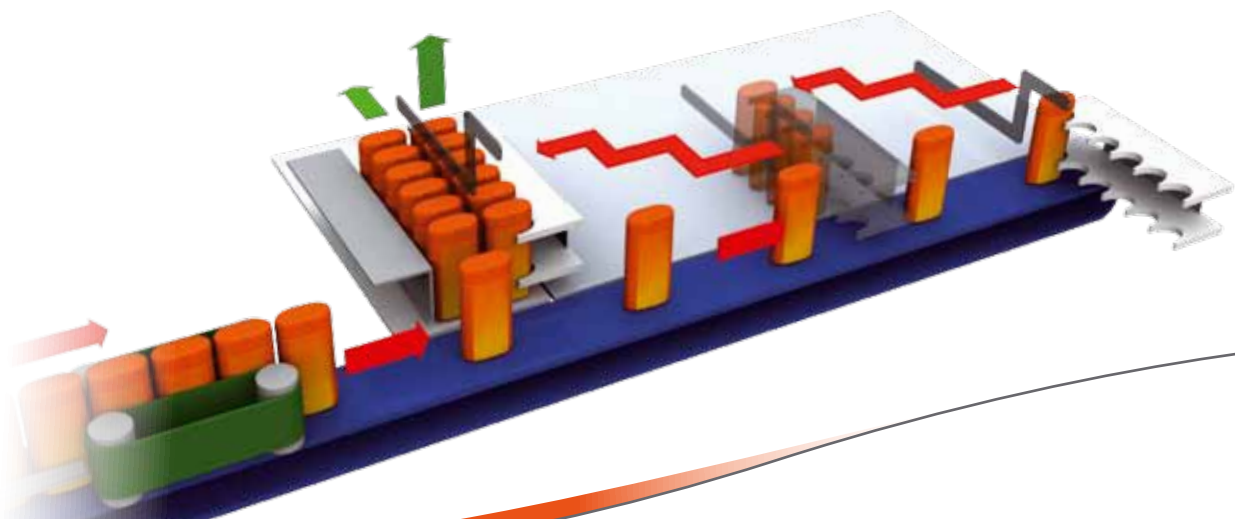

- ▶ Module which can be independent or integrated into the product collating section of the case packer
- ▶ Sub-assembly able to function with all side or top loading systems for RSC, trays or wrap-around blanks
- ▶ In-line product infeed on a conveyor, without accumulation, guaranteeing optimum product protection
- ▶ Products spaced out by servo-driven lateral bands which can be adjusted to suit the product shape and resistance
- ▶ Spacing out also possible by servo-driven selecting star-wheels for bottles where required
- ▶ Beam+comb servo-driven on 2 axis to form rows with high repeatability and accuracy in product placing
- ▶ Selecting system that does away with product turning/spacing using scrolls

▶ ADVANTAGES

- ▶ Reliable and robust solutions, total access
- ▶ Completely standardized module optimizing the cost/quality/lead-time ratio
- ▶ Particularly compact footprint in relation to a pre-collating system with a lane divider
- ▶ Quick format changeover by easy and ergonomic dismantling of the comb and counter-comb designed to pre-collate the products and form the batch
- ▶ Products stocked on a dead plate when machine stopped to prevent scuffing
- ▶ System especially economically viable for 3 formats or more
- ▶ Cost of adding a new format reduced by the low number of change parts
- ▶ Reduction in change part storage space

▶ PERFORMANCE

- ▶ Very low noise level
- ▶ Speed: up to 250 products/min depending on the type of products and collations
- ▶ Speed: up to 300 products/min by associating a phaser to pre-collate products
